

MPT DELIVERY SYSTEMS, INC.

FLUIDIZED BED & HIGH-SHEER GRANULATION TECHNOLOGIES

A DIVISION OF PHARMACHEM LABORATORIES, INC. 

SKILLED IN THE FINER POINTS OF GRANULAR TECHNOLOGY

MPT Delivery Systems, Inc., a division of Pharmachem Laboratories, Inc., is a leading developer and manufacturer of specialty granulated bulk ingredients for the food, beverage and nutritional industries since 1978.

MPT specializes in fluid-bed, high-shear granulation and blending technologies. Our proven approach yields top quality products, whether that be granulated, encapsulated, taste masked, agglomerated, instantized or custom formulations. In addition, MPT is certified organic, with Kosher certification also available.

CUSTOM PRODUCTS - FROM CONCEPT TO PRODUCTION

The development and manufacture of custom products tailored precisely to suit each client's needs is our lifeblood. From the onset of a project, we partner with customer development teams from concept through production.

To fully meet customer satisfaction we engage in a bevy of full-service capabilities, which include compression testing, chemical and composition analysis, physical powder profiles, organoleptics, and results reporting.

Once a custom ingredient has been approved, MPT moves quickly through the process to complete all compounding and manufacturing phases, as well as maintaining top levels of security to protect proprietary formulations every step of the way.

A REPUTATION BUILT ON THE STRICTEST STANDARDS IN THE INDUSTRY

It is with good reason that MPT enjoys long-term status as an industry leader. The company has forever adhered to a finely honed reputation for dedication to the strictest of standards on behalf of our food, specialty chemical and nutritional industry customers.

Best of all, our range extends from research and development to all phases of manufacturing. With our mission being first and foremost to create the very finest custom ingredient products for every client. On every given assignment.

MPT 

ALL VOLUMES - FROM TRIAL BATCHES TO FULL SCALE PRODUCTION

MPT offers diversified technologies necessary for multi-component granulations and delivery systems. Our capabilities extend to drying, milling, micronizing, sizing, blending, coating, instantizing, taste masking and flavor development for a wide range of product formulations.

MPT can even accommodate all volume requirements, from trial batches to full scale production. Each batch is controlled in compliance with GMP laboratory protocols with Kosher certification available as well.

OUR SERVICES INCLUDE:

- Leaders in specialty granulation bulk ingredient manufacturing
- Fluid bed, high shear granulation
- Compounding and processing drum-to-hopper ingredients for various dosage forms
- Customized direct compression blends
- Micro encapsulated bulk ingredients with specific release characteristics
- Powders for smaller dosage forms
- Drying, milling, sizing, blending, coating and instantizing
- Taste masking and flavor development
- Chilsonation, roller compaction
- Micronization
- Particle Separation
