VITAL STATISTICS

Year Founded: 1968

Number of Employees: 400

WHO WE ARE

Established in 1968, ABC is a privately held company of about 400 scientists and support personnel. We provide a broad array of GLP and CGMP-compliant product development and analytical testing services to the pharmaceutical, biotech, animal health and medical device industries. Our approach to doing business promotes relationships beyond a simple transaction. It facilitates collaboration, promotes quality, makes better use of resources, and helps us plan to have the right talent and resources when and where our clients need them. It also improves decision-making, which can save time, money and reduce risk. In other words, better insight, better outcomes.

For more than four decades, ABC has been delivering analytical expertise in support of product development. But like the industries we serve, our company has changed. Today's ABC offers more than superior science and quality data. Through development know-how, cross-disciplinary technical expertise, and applied experience with multiple regulatory frameworks, ABC delivers the kind of scientific insight that drives better outcomes.

SERVICES OFFERED

ABC provides IND-enabling, registration and post-commercialization support for the development, quality control and lifecycle management of innovative therapies and generic medicines.

- Method Development & Validation (Drug & Drug Product)
