YOUR SINGLE SOURCE FOR NON-STOP LABEL PRODUCTION

Profitable high volume roll label manufacturing starts with continuous production. Our advanced Automatic Roll Changers provide superior reliability, flexibility and ease of use. CTC's track record of innovation and fresh ideas provides the cutting edge tools you need to prosper. See us for creative solutions to all your roll label automation needs.

SUPER COMPACT BUTT SPLICERS

CTC's "Power Splice" Butt Splicer is a super compact front loading design that can hold two 40" diameter rolls in the smallest floor space. Splicer features roll loading and driven unwind spindles as standard, providing the ability to unwind the most delicate materials, without brakes to wear and need replacement. Both splice tapes are applied to the web when stopped, for best reliability. Splicer

can also be prepped to make a one-sided splice, with the tape always on the same side without turretting the unwind rolls. For those preferring outboard supported construction, we offer shaftless models with roll loading. Whichever style you prefer, CTC Splicers provide efficient non-stop raw material flow into your press, reducing raw material waste.

GLUELESS TURRET REWINDERS SIMPLY BETTER

For single-pass label finishing, simpler is better. So, why use glue on Turret Rewinders? Our line of Glueless Start Turrets automatically start and tuck multiple web streams onto the cores without using glue. Your benefits include: 100% usable labels on the roll, reduced

100% Glueless Non-stop Revinder

energy costs, reduced material costs (no glue to buy), Labor Savings, and safety, delivered in an "environmentally green" solution. Add one of our high speed Automatic roll closing tail Labelers for a 100% Glueless solution. Need short cycle times for small roll productivity? We have the fastest cycling tail labelers available.

HI TECH SLITTER REWINDERS AND DIE CUTTERS

CTC is the North American Agent for the Flexor Brand of roll finishing equipment made by EMIS. Flexor is a rising star in the high quality value priced roll finishing segment of the label industry. Products include the familiar line of Flexor Slitter Rewinders, Die Cutters, Inspection winders and roll doctors featuring servo drives, compact designs, and innovative features. The "Flexi" roll cart is

a compact economical solution for loading rolls onto unwinds and removing finished rolls from rewind shafts. All North American sales, service and parts supply for Emis Ltd. will be based out of CTC's NJ facility.
