WHO WE ARE

Infus Medical is a Thailand registered company with unique focus on full service contract manufacturing of single-use Class II and Class III medical devices through OEM and private label applications for the global multinational medical device industry. We specialize in the field of the Minimal Invasive Surgery, Implant devices, Biopsy devices, Critical Care, Blood Transfusion system, Apheresis, and Renal and IV Therapy products. We are experienced with every step of the process, from concepts to prototypes to finished products or full-scale production.

Below are our key offer:

- Turn-Key Manufacturing
- Contract Manufacturing
- Manufacturing Transfer

Our Quality System is assessed and certified through external audits. Infus' facilities are routinely audited by accredited certified body, customers, international authorities, and the US-FDA with satisfactory conforming results.

MAJOR MARKETS

Full-service contract manufacturing to serve the global multinational medical device industry of Class II and Class II devices:

SERVICES OFFERED

If you ask Infus' customers why they stay with us, some may say due to the cost savings and economic values that we deliver, while the others may say our flexibility, our service and our responsiveness.

But what everyone agrees on is the Infus **Quality and Trust**. And that is what we pride ourselves on the most. As we continue to move forward, we will never leave our core values.

Infus has invested in our people and technologies in order to deliver maximum value to our customers. Our goal is to strike an optimum balance between product development flexibility, minimum lead time, competitive costs, and consistency supply of product – **all without compromising on quality**.

We provide our operational work in:

- Liquid Silicone Injection Molding/Injection Molding/ Blow Molding/Extrusion
- Welding (Laser/RF/Heat/Ultrasonic)
- Metal Flaring/Grinding/Electropolishing/Soldering
- Clean Room Assembly
- Bonding
- Sealing and Packaging
- Inspection and Testing
- Electrical Parts Assembly
- Freeze Dry
- Sterilization
- Siliconization
