Company Description

NSF International is an independent, not-for-profit organization accredited by the American National Standards Institute (ANSI) and the Standards Council of Canada (SCC) to provide certification of dietary supplements.

The NSF Dietary Supplement Certification Program utilizes state-of-the-art analytical laboratories and highly-skilled staff of chemists and microbiologists with the knowledge and expertise to evaluate the composition of dietary supplements, including: vitamins, minerals, herbs/botanicals, amino acids, sports supplements, concentrates, metabolites, constituents, and extracts. NSF certification service includes product testing, Good Manufacturing Practices (GMP) inspections, ongoing monitoring and use of the NSF Mark. NSF also developed and maintains the only accredited American National Standard for dietary supplements – NSF/ANSI Standard 173.

In addition, NSF also certifies products to help ensure they do not contain any prohibited substances for athletes. This athletic banned substance certification program, known commonly as Certified for Sport® is recognized by MBL, MLBPA, NFL, PGA, LPGA and CCES. Founded in 1944, NSF is committed to protecting public health and safety worldwide. NSF is a World Health Organization Collaborating Centre for Food and Water Safety and Indoor Environment.

Key Personnel

Lori Bestervelt
