## Company Description

Premium Ingredients International is the trusted global leader in ingredient distribution and the number one importer of Ascorbic Acid and its derivatives, B Vitamins and Amino Acids. We are your connection to high-quality ingredients and flavors, as well as value added solutions. With our new state-of-the-art climate controlled grinding facility, we can offer custom particle size reduction on premise to save you the time and money of having to use multiple sources.

Under our Flavor Savor™ brand, we offer a broad product line of high value liquid, powder and specialty flavors. Together with our highly responsive full service R&D lab, we can provide the technological support to help your company formulate successful new products or enhance existing ones without large minimums or commitments.

Finding ingredients that add value to your business is what we do best. Let us be your one stop solution!
