Company Description

Sytheon Ltd. is an active ingredient supplier/innovator for the personal care industry since 2006. Sytheon headquarters is located in the US and its European affiliate is in France.

Safety-Performance-Differentiation-Stability are the four key value drivers Sytheon strives for in designing products. While a large part of the Industry has focused on green and bio-concepts, Sytheon has opted for defined material, strong product characterization and claim substantiation, whether dealing with natural or synthetic products. Sytheon is being recognized as a technology-based customer driven company. Sytheon's advantage comes from strategic partnering with global personal care companies. Markets in the US, Europe, and rest of the world are being served by Sytheon directly or through country/region specific distributors.

US Sales

Technologies/New Products/Patents

Sytheon develops and offers a wide range of scientifically and clinically validated ingredients for improving the health and beauty of skin. Sytheon provides innovative solutions in the areas of: aging skin, skin protection, problem skin, sun protection, pigmentation control, skin hydration, barrier function, photo-stabilization, and hair fiber protection. Sytheon has several issued and pending US and European patents.

Synoxyl® HSS

Synoxyl® HSS is a breakthrough First-in-the Industry patented product. It is an excellent photostabilizer, provides in-vivo SPF boosting by 50% for both organic and inorganic sunscreens and protects skin by inhibiting up-stream ROS cascade, namely, NADPH oxidase inhibitor, Chelator and inhibitor of cyclobutane dimer formation. None of the photostabilizers available in the market can offer so many benefits as Synoxyl® HSS provides.

Synoxyl® HCP

New Product: Easy-to-use water soluble version of Synoxyl® HSS which is developed to stabilize water-soluble colors and other photosensitive compounds. Excellent chelator and is far

superior to existing commercial chelators, such as, EDTA, EDDS, Desferal etc and has no pro-oxidant property.

Synastol® TC

Synastol® TC is a standardized & defined edible fruit extract of Terminalia chebula of Ayurvedic origin. Excellent broad-spectrum skin protector and rejuvenator. Anti-glycation effect of the product is seven fold more than Aminoguanidine. Clinically proven to show significant reduction in multiple signs of aging and dark circle around the eyes. Can be used in skin lightening products due to its strong peroxidase inhibitory activity. No-regulatory hassle due to water-based process.

HydraSynol® DOI

(formerly known as Synovea® DOI)

A smart patent protected skin hydrator and barrier function builder which intelligently provides hydration where it is needed for the best results. Clinically shown to be very effective in providing long-lasting (>48 hrs) and controlled skin hydration. Works by stimulating Aquaporin-3 and Tight Junction, Desmosomes and Epidermal Differentiating genes/proteins. E-Cadherin up-regulation provides broad-spectrum skin homeostasis. ECOCERT material.

Synovea® HR

The New Gold Standard in lightening/even-toning with anti-aging benefits. Clinically proven to be four-times more effective than Hydroquinone. Multiple clinical studies with Synovea® HR demonstrated its strong performance in skin brightening and hyper-pigmentation control. Provides protection to DNA, Cells and Proteins and stimulates Collagen and Elastin.

Asyntra® SL

Easy-to-use synergistic skin lightening blend of Synovea® HR and Synovea® EL (Ethyl linoleate) in Caprylic/capric triglycerides. Clinically proven.

Sytenol® A

The New Gold Standard in anti-aging. Extensive research and clinical studies have confirmed that Sytenol® A is a true Retinol-like functional compound without having the negatives of Retinol. Sytenol® A is a well-defined natural compound, not an extract and has a purity of well over 95%. Skin protection and anti-acne properties of Sytenol® A has also been clinically validated. Excellent stabilizer for Retinol, Squalene, Linoleic acid etc. Protected by multiple issued and pending US and foreign patents.

Synactin® AC

Clinically proven to mitigate acne-affected skin. Designed to alleviate all five key acne targets: Hyper-keratinization, Bacterial population, Sebum control, Inflammation and Pigmentation

Major Markets

Personal & skin care and selective hair care markets

Specialized Services

Develops exclusive customer specific projects in the areas of synthetic and natural compounds, and deliver cost-effective solutions to satisfy customer needs. Provides turn-key solutions to customers for bringing effective products to the market.
