

# 2014 Company Capabilities

Texsus SpA is specialized in the production of high loft ADL (Acquisition Distribution Layer) made by air through bonding technology; in addition to that, manufactures soft fancy topsheets, absorbent cores and highly engineered multi-layer nonwovens. TEXSUS has completed the new investment of over 25 mio euros in Italy, to consolidate his position as leading supplier of air through bonded nonwovens ADL and topsheets. It includes the construction of a new building for over 10000 sqm, the start up of a new Air through bonding line and additional spooling lines.

## BRAND NEW PRODUCTS

Texsus new products and developments bring forward our customers' need and respond to the newest market trends. Besides Texsus known Acquitex ADL and Multifunctional Acquitex ADL, it has been developed the new **Vortex ADL**, the fastest acquisition and complete liquid distribution ever seen! With its unique structure and water holding properties has been created for fluffless diaper structures, it is able to enhance liquid acquisition and distribution, surface dryness and water holding properties.

**Absortex Core**, an absorbent core produced by an innovative engineering process. Absortex core has several advantages compared to existing pre-made cores, as: flexibility, allows to manage high amount of SAP in a thin layer assuring extremely high absorption levels and possibility to customize the product. Your thinner product our higher absorption! With enhanced liquid absorption properties can be used for baby, inco and femcare hygiene products as well as for medical application.

**Multitex line** with its 2 in 1 function, soft topsheet and ADL in one easy to use structure! Texsus continuous innovation has given life to 2 new products that are part of Multitex Family:

**MULTITEX DRY** with an apertured top side and an improved system to control dryness and stain appearance **MULTITEX WATER HOLDING** with a special structure that has water holding properties

**Softex:** extreme soft topsheet that can also be available in stripe, 3D dots, flowers and geometrical design or perforated. They can also be treated with a wide range of natural treatments as aloe vera, vitamin E,

silk protein and cotton extract.

**Upcoming product:** Evetex specially designed for women who like extra comfort and body fit sensation. Feel free to move!

**ENVIRONMENT, QUALITY AND R&D:** Texsus is committed to produce more green products focusing on the improvement of process efficiency, reduction of energy consumption, recycling of production wastes, usage of renewable and recyclable sources; a 1 million euro photovoltaic plant produces part of its electrical energy consumption.

Quality and Research are the drivers of Texsus know-how. The Company is ISO 9001 certified and keeps improving the Quality management system to achieve excellence. Texsus R&D takes advantage of the **pilot line and internal laboratory** to develop and analyze innovative products in order to optimize the customers' product performances.
