WHO WE ARE

AMT is well versed in the manufacturing marketplace specifically with multi-axis swiss turning, multiple axis milling, assembly and kitting, light fabrication, laser marking and welding, and final product processing including polishing, blasting, titanium type II and type III anodizing, and finally packaging and labeling services. You can count on AMT for all of your needs whether it be high volume packaged and labeled implants or turnkey assembled and kitted complex instruments and assemblies.

Quality is a part of everything we do at AMT, and in every process we offer. In addition to simply meeting current regulatory and product specific demands, quality at AMT is defined by our customer service as well as custom tailored metrics in on-time delivery, lead time standards, pricing value and zero defect production goals. It is our belief at AMT that to be successful you must integrate quality into everything as well as everyone equally as part of the manufacturing process.

Technology and progress are important goals for AMT as we continue to grow within the Ortho marketplace. AMT currently operates out of a 65,000 sq. ft. facility utilizing the latest in software, machine tools, inspection tools and methods and best practices in current overall manufacturing technologies.
