VITAL STATISTICS

Year Founded: 1948
Number of Employees: 70
Number of Facilities: 1

WHO WE ARE

Drill Masters-Eldorado Tool is one of the largest suppliers and manufacturers of deep hole gun drilling tools, fixtures, and accessories in the world. Our combined experience and resources offer the widest selection of in-stock deep hole gundrills and the greatest range of products, services, and experience proudly made and based in the United States. Add our rapid delivery and expanded customer service facilities, and it's apparent why we're the leader in gundrilling for parts, service, and innovative assistance.

MAJOR MARKETS

Drill Masters, which had originally been founded as a tool manufacturer, evolved into a respected supplier of deep hole drills and accessories for the automotive, aerospace, medical, firearms, off-road, heavy equipment, farming, and molding industries.

SERVICES OFFERED

We have a dedicated staff of experts with over 85 years of combined experience to assist the customer with all of their special requirements. At the beginning phase of an engineering project, give us a call to discuss the process sequences required to avoid unnecessary problems in the future. If the customer is experiencing any gundrilling problems or has questions, they should contact our engineering staff for solutions.

Re-Tipping: When a tool reaches the point when it can no longer be used because it has been re-sharpened to its limit, it is chipped

or misused, etc. send them back to us for re-tipping. This saves our customers as much as 25% the cost of a new tool. This service can also be done on a competitor's tools.

Re-Sharpening: We provide a re-sharpening service which enables our customers to return their used drills and have them re-ground to factory specifications and returned within 24 – 48 hours. This service can also be done on a competitor's tools.

Re-Conditioning: If a tool is damaged due to accidental crashes, operator error, or misuse, it can be returned and re-conditioned to the original manufacturer's specifications. This service can also be done on a competitor's tools.

Seminars: We offer seminars detailed to the customer's specific needs either at our facility or yours. These seminars can be formal or informal and contoured to upper management, purchasing, engineers, operators, or set-up and maintenance personnel.

Feasibility Studies, Tooling, Application & Machine Analysis: Is it right? Can it be better? How can we cut some costs? What are our options? These are all of the questions to be considered when evaluating the customer's process. One option is to have an expert come in and evaluate your application and process to see what can be added, enhanced, or omitted to make the process more efficient.
