Company Description

For over 25 years, Jost Chemical Co. has been a manufacturer of high purity specialty mineral sales for the nutritional, pharmaceutical and reagent markets. Jost has two manufacturing buildings totaling 190,000 ft² located in St. Louis. Both facilities are registered with the FDA and operate under bulk pharmaceutical cGMPs. Jost is a trusted, global supplier of high purity chemical salts that meet USP/EP/FCC/ACS requirements and are Kosher and Halal certified. By focusing on product quality through controlled validated processes and lot-to-lot consistency, Jost is able to manufacture products that go beyond the established standards. Our wide selection of 250+ products includes citrates, gluconates, lactates, malates, fumarates, ascorbates, succinates, carbonates, nitrates, phosphates, and sulfates.

Jost Chemicals is able to produce high purity mineral salts that are virtually free of impurities such as Al, Pb, Cd, As and Hg. Products are rigorously tested to confirm they do not contain common microbial contaminants. Every step of the process is controlled to make sure that all products meet the highest levels of purity.

Our mission is to "deliver quality on time". We are passionate about our customers and focused on providing value added solutions, technical expertise and personalized service. Through innovation, flexibility and quick responses, Jost delivers products that meet your exact specifications. Jost successfully addresses applications from initial concept to finished products.

Key Personnel

Jerry Jost
President and Owner

Jeff Lenger
Director, Sales and Marketing

Technologies, Patents, New Products

Family of Low Heavy Metal Mineral salts with levels of lead, cadmium and arsenic less than 1 ppm maximum and Mercury levels less than 0.1 ppm maximum.

Calcium salts with levels of aluminum less than 5 ppm maximum.

Major Markets

- Vitamins/Mineral Supplements
- Functional Foods/Sports Drinks
- Infant Formula
- Nutritional Beverages
- Pharmaceuticals/Biotech
- Oral Care

Major Products

High Purity Minerals Salts

Specialized Services

- Custom particle sizes from ultrafine powders less than 6 microns to free flowing granulars
- Custom Packaging
- Product Development
- In-house instrument and wet chemistry capabilities
- On-time delivery
