Lederle Machine Co. is a manufacturer of rotary tooling, rewind-inspection equipment, and other pressroom accessories. Founded more than 50 years ago, Lederle has built an impressive reputation for excellence by remaining dedicated to the traditional values of superior product quality and customer service.

Lederle's product line is known for outstanding performance, reliability, and longevity:

- CNC Engraved Rotary Dies
- Removable Blade Tooling for Sheeting and Perforating Print Cylinders
- Adjustable Lineal Tools
- Fully Hardened Anvils
- Complete Retooling Services
- Rewind-Inspection Tables

A Certified Woman Owned Business, Lederle promises competitive prices, a knowledgeable sales team, and quick deliveries. Committed to their customer's success, Lederle works to establish

solid relationships and provide everything the customer needs as quickly as possible, often in only a day or two.

Lederle offers a number of useful on-line services on their website, www.Lederle.com, that include die quoting, order status tracking, previous order history, and the HelpLine.

Lederle keeps abreast of important trends in the industry. This is leading to their development of a new servo driven rewind-inspection table aimed at the pharmaceutical market which will accommodate ink-jet

printers, video inspection, and barcode verification. "A servo driven machine is the next logical step allowing our already workhorse rewinders to be adaptable with printers, bar code scanners, and bar code verification" – Russ Travis

Lederle promises outstanding performance and reliability, with a truly dedicated staff of professionals that strive to keep that promise. That is one more reason it has been said; "Once a Lederle customer, always a Lederle customer."

If you are a current Lederle customer, they thank you for your business. If you are not, they ask for the opportunity to work with you. Please call 1-800-433-2106 or visit their website, www.Lederle.com and put them to work for you.
