### SERVICES OFFERED

#### Complex CNC Machining and Wire EDM

Specializing in complex parts. Spindle speeds on our CNC's of 50,000 RPM's allow for smooth finishes on your smallest features. Providing parts made from stainless steel, titanium, aluminum, plastics and much more. Our Wire EDM's are capable of producing complex features on prototype and production quantities. Combined with our other services, we are capable of producing all of your assembly requirements.

#### Precision Metal Stamping

Specializing in complex, difficult parts. If you're having trouble meeting certain requirements, call us. New technology and innovation drive our industry leading approach. Our tooling design and engineering groups will work with you to develop the most cost effective components for your applications. Our capabilities include material thicknesses ranging from less than .001" up to .125" in various material types. Heat treating, plating, passivation, welding, machining and assembly are services provided to our current customer base.

#### Rapid Prototyping

Specializing in Rapid Prototyping of precision metal stampings, assemblies, machined components, medical devices, surgical knives and scissors. Our engineering group will review your requirements and make recommendations that may enhance product performance and reliability as well as reduce cost. Utilizing Pro/ENGINEER, SolidWorks and AutoCAD Lyons can effectively communicate with your designers.

#### Cleanroom Packaging and Assembly

Utilize our private cleanrooms for your production requirements. Whether it's a new product launch or an existing program, you can rely on Lyons to provide you with the service and attention that others have come to expect. Short term capacity issues in your own cleanrooms, call us.
