Contact: Wade Fouts, Sales Manager

COMPANY HISTORY

The Wilson story began in 1979, when father-and-son team John and Matt Wilson founded Wilson Manufacturing to custom-build punching equipment. Since that time, the company has evolved into a full-service global supplier for the flexographic industry, custom-manufacturing everything from machine-sharpened dies to specialty products like plunger and vacuum dies, magnetic and print cylinders, anvil rolls and more.

Across the globe, Wilson Manufacturing delivers premium quality parts to converting customers in 27 countries. And, we're more than ready to meet your rotary tooling needs with the same world-class commitment to your success.

INNOVATION

Thanks to over 30 years' experience and industry innovation, Wilson is more than ready for any rotary tooling task. In 1999, for example, we pioneered the use of machine-sharpened dies (MSD) for better performance. Today, we remain the only company offering machine-sharpened and hardened dies—and we're moving forward with new innovations such as machine-sharpened flexible dies. In fact, our R&D team continues to develop production techniques and equipment every day that are truly unique to Wilson.

QUALITY

From basic rotary dies to flexible sheet dies and beyond, Wilson provides the industry's highest quality, precision-tooled parts. To ensure parts durability and long life, we use only premium quality raw materials. For guaranteed accuracy, all products are manufactured on automated, state-of-the-art CNC equipment. Plus all orders are triple-checked to confirm quality prior to shipping.

SERVICE

For superior customer service, Wilson offers the same strength and capabilities of a large Fortune 500 company, combined with the responsiveness of a smaller family business. Our experienced team understands your business and is ready with expert technical advice for problem-solving. We also have 24/7 online service for convenient ordering and tracking, as well as quick turnaround times—typically a three-day lead-time on most orders.

At Wilson Manufacturing, to bring you the very best performance and precision in rotary tooling, we've invested 35 years and millions of dollars to remain on the industry's leading edge! Call us today to learn more, or visit our website: wilsonmfg.com.
